

Make doing the washing
more enjoyable.

LAUNDRY JET
x 

osach
Air to move

**No more smelly laundry baskets
in your bedroom,
wardrobe or
bathroom.**

The Laundry Jet is the **first vacuum powered laundry chute** that transports laundry from any room with ports installed, to the laundry room. Unlike a traditional laundry chute, the Laundry Jet can be used regardless of if a home is multi-level or single story because it is not reliant solely on gravity. It can be installed seamlessly into any custom laundry room design and existing laundry rooms. This is a must-have laundry item for any family or individual looking for a convenient and safe way to transport clothes to the laundry room from any room in the house.

How does it work?

To use the Laundry Jet system, simply open the nearest port to activate the system. Using the open port, feed dirty laundry into the open port to be transported into the laundry room.

Works in
Multiple or
single level
homes

Transports
clothes up to
60m

Adaptable for
industrial use
